

Digital calliper RW Edition

Callipers with calibration certificate and a measuring range of 150 mm

- Digital callipers with Reinhold Würth signature
- Measuring range up to 150 mm
- Two buttons for switching on/off/zero and metric/inch
- Very easy-to-read display, even from wide viewing angles
- Long service life and reliable measurements due to reinforced plastic housing and ground measuring jaw
- Easy transfer of measurement results using the locking screw on the top to lock
- Automatic shutdown after approx. 20 minutes
- Thread table on the rear of the callipers and in the plastic box

Scope of delivery:

- 1x digital callipers
- 1x CR2032 button cell
- 1x plastic box
- 1x calibration certificate

Absolute length measuring accuracy	0.01 mm
Digit increment	0.01 mm
Max. length measuring range	150 mm
Length of jaw	40 mm
Height	38mm (1.5in)
Width	272mm (10.7in)
Depth	102mm (4in)

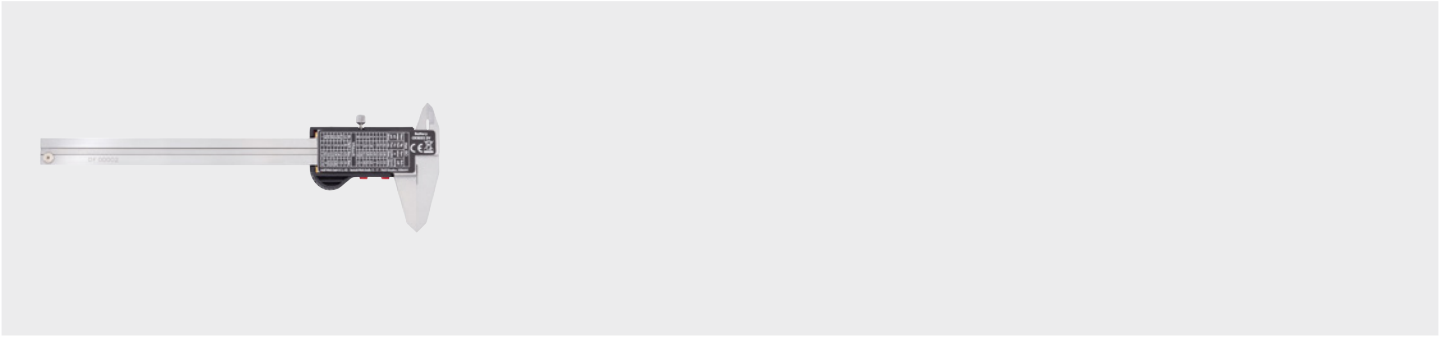

Art. no. 0715 761 925

P. Qty.: 1

Details/Application

- The RW Edition digital callipers are ideal for precise measurements in metal processing work, mechanical engineering, quality control and workshops
- With a measuring range of 150 mm and a calibration certificate, it is ideal for professional use

Notice

- Keep the callipers clean and dry. Fluid can damage the slide
- Surfaces should be carefully cleaned with cotton fabric
- Never use petrol, acetone or other organic solvents
- Never apply voltage to parts of the digital callipers (e.g. engraving with an electric pin) as this may damage the circuit
