Treat Symptomatically.

SECTION 05: FIRE FIGHTING METHODS

Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media : High volume water jet.

Specific hazards arising from the hazardous product (e.g., hazardous combustion products):

Fire Hazard : Keep away from heat and sources of ignition. Flash back possible over considerable distance. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

Hazardous Combustion Products : Carbon Oxides

Special protective equipment and precautions for firefighters:

Specific Protective equipment for fire-fighters : Use personal protective equipment.

Specific Extinguishing methods : Use water spray to cool unopened containers. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:

Protective equipment : Remove all sources of ignition. Ensure clean-up is conducted by trained personnel only. Wear appropriate protective equipment such as gloves, safety goggles, and coveralls when handling in bulk.

Small Spill : Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.

Large spill : Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk.

Methods and materials for containment and cleaning up:

Emergency procedures : Mark the danger area. Consider evacuation. Stop engines and no smoking. No naked flames or sparks. Spark- and explosion-proof of appliances and lighting equipment. Keep containers closed.

Environmental precautions : Do not allow contact with soil, surface, or ground water.

Cleaning procedure : Eliminate all ignition sources if safe to do so. Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material, or otherwise, contain material to ensure run off does not reach a waterway.
